BATHROOM OVERVIEW

Imagining the future is a fascinating challenge: for over sixty years, we have been dressing technology in elegant clothes with a strong identity, improving its efficiency thanks to constant investments in production processes. The Premium collection, with its matching accessories, is dedicated to the architect, while the Living collection is ideal for everyday life.

TOTAL RELIABILITY

Our product epitomises cutting-edge technological innovation at the service of quality of life and respect for the environment. It reflects the use of first-rate materials worked by means of state-of-the-art processes. That's why we are proud to guarantee our Nobili Widd® 28 and 35 mm cartridges for a period of 20 years.

BRASS MIXING ROD AND FLOW LIMITER

The mixing rod of the Nobili Widd® cartridge is made of brass instead of plastic, which guarantees better strength and reliability over time. The insert limits water consumption by braking the opening of the control knob at mid-stroke, while avoiding vibrations thanks to a perfect seal between the rod and lever.

TEMPERATURE LIMITER

The Nobili Widd® cartridge has a reducer that limits the maximum temperature delivered by the mixer, reducing the consumption of hot water and, at the same time, avoiding dangerous scalding risks. You can configure it to suit your needs by simply turning it to the left or right.

CERAMIC PLATES

The main component of the Nobili Widd® cartridge, the pure ceramic plates, allow for unparalleled smoothness of lever movements. The friction system of the discs prevents them from rubbing against each other when the mixing lever is turned to the closed position, reducing wear.

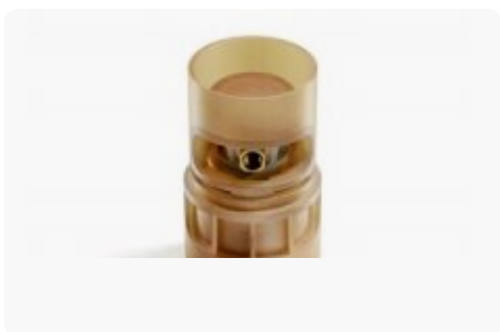

ULTEM™ 2200

The shell of the cartridge was created in the Thermoplastic Moulding Department: it is made of ULTEM™ 2200, a 20% glass fibre filled plastic polymer that gives greater rigidity while maintaining a high degree of elasticity and resistance. This material is used mainly in surgical or high-tech products.

PURE MINIMALISM

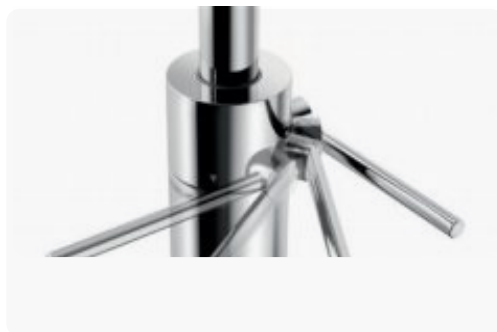

Pure minimalism, pure technology, pure freedom. Velis eliminates the superfluous and returns to the essential, through a modern and timeless line: the Nobili Widd® full immersion cartridge (in its most recent version with axial mixing) allows an unprecedented and extraordinary balance between style and progress.

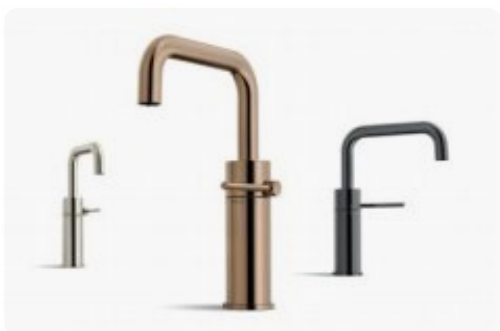

NOBILI WIDD® 2020 CARTRIDGE

The excellence of our research and development laboratories has produced the full-immersion Nobili Widd® 34-millimetre cartridge with axial movement, which can revolutionise the structure of traditional mixers by eliminating the side cartridge block and giving life to an extremely clear, streamlined profile.

WATER AND ENERGY SAVING

Always providing cold water to start with eliminates CO₂ emissions deriving from the accidental activation of the gas burner: combined with the retractable aerator with flow limited to 5 litres per minute, it represents the highest expression of technological research in the entire sector.

IMPECCABLE FINISHES

In addition to the more traditional Chrome and Inox finishes, Velis comes in three spectacular new PVD shades: Nickel, Red Canyon and Diamond Smoke. Extremely bright and flashy, they ensure high technical performance thanks to a very advanced scratch-proof and wear-proof surface treatment.

COMPLETE RANGE

The pure expression of art is available in a very broad range, in the light of total freedom of design. Care and order can be delivered in the bathroom through Zen accessories, which evoke the minimalist style of the tap features and create modern, elegant atmospheres.

EVERYDAY SUSTAINABILITY

Sand, like all the other Living collections, promotes a zero environmental impact philosophy through maximum water and energy savings: the aerator (with a flow rate limited to 5 litres per minute) is combined with cold water flowing when the tap is turned on, which means the boiler does not activate and no combustion fumes are released into the atmosphere.

NEOPERL® AERATOR WITH LIMITED FLOW RATE

Excellent protection against limescale, maximum reliability over time, a full-bodied jet even in suboptimal flow conditions: Nobili chooses the quality and sustainability of the Neoperl® Cascade® aerator with a flow rate limited to 5 litres per minute - the easiest and quickest way to help protect the planet.

SNAP WASHBASIN DRAIN

This drain is equipped with grooves that create an anti-unscrewing lock (in traditional drains, the vortex created by the water tends to unscrew the lock nut). No tools are needed to adjust it, it is tamper-proof (it cannot be removed) and anti-tilt, thanks to deeper-than-standard wings.

NPI ITALIA PARINOX® SOFTPEX® HOSES

The first flexible hose approved all over the world, thanks to its internal hygiene properties (which offer excellent protection against the action of additives found in water, such as chlorine), its optimum resistance to temperature and pressure and its improved flexibility compared to traditional PE-X hoses.

GUIDE RING

A detail that underlines the care and dedication in the design and at the same time the extreme consideration for the installer: a guide ring made of highly resistant plastic material guarantees perfect centring of the tap in the ceramic hole, simplifying and speeding up installation.

Premium

VELIS

Centro Stile Nobili

Pure minimalism. Pure technology. Pure freedom. Velis celebrates the start of a new decade through a timeless line, patently marking a border with the past: the most recent version of the Nobili Widd® cartridge with axial mixing makes for an unprecedented and extraordinary balance between form and avant-garde.

DRESS

Nilo Gioacchini

We now consider our homes to be true sensorial spaces in which architecture and design express their identities in constant harmony. The formal synthesis of the Dress collection is not limited to completing bathroom furniture: it evolves into a broader, more complete project that can coordinate visual and tactile sensations, choosing from an unlimited range of surfaces for the lever and spout, in which every detail reveals its personality giving life to a uniform, highly emotional space. In the T.E.A.+® stainless steel version, the mixer undergoes a state-of-the-art galvanic process that protects the surface finish from corrosion so it does not alter over time.

Note: to complete the coding of the article you must replace the dashes at the end of the product code with the number reference of the cover, choosing it from the ones shown in the following pages. The exclusive nature of the covers is the result of their irregular patterns and hues, so the images, which only show a part, may not reflect the final effect on the product.

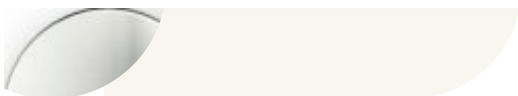

Finish variants

Inox T.E.A.+®

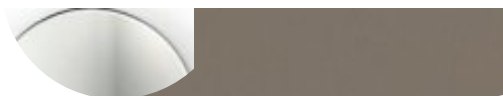

COLOUR

Refined and versatile shades are valorised by the contrast of the chromed lights. Essential, sharp or delicate, the hues of the Colour laminates allow to create a space that is coherent yet at the same time sophisticated, in which tones harmoniously fit into a pondered series of hinted connections to the various furniture elements.

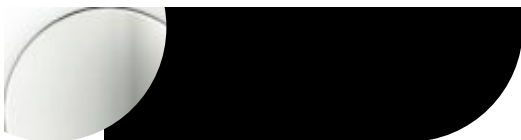

CHROME AND MILKY WHITE

01

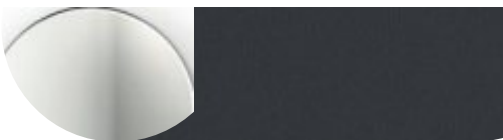

CHROME AND SAHARA BROWN

07

CHROME AND GOTHAM BLACK

02

CHROME AND VOLCANIC GRAY

08

WOOD

Material waves are in a constant dialogue with the furniture items: four Wood nuances suitable for creating a warm, natural atmosphere without sacrificing the elements' elegance and minimalist style. Masterfully balanced contrasts with an intense character offer the chance to create welcoming and timeless settings.

CHROME AND SHABBY WOOD

09

CHROME AND HERITAGE WOOD

LIVE

LIVE

Centro Stile Nobili

A mixer tap of convincing design is usually obtained when all is in perfect harmony: as is the case of the Live collection, in which the absolute proportions of the parts liberate the stylistic excesses and follow the formal elegance of the cylinder with consistence. The unequalled eco-friendliness of the Nobili Widd® 35 cartridge completes this exceptional example of harmony, and provides proof of the close ties of the brand name with technological efficiency and respect for the environment.

ACQUERELLI

ACQUERELLI

Centro Stile Nobili

The basic principle of the Acquerelli collection: cutting-edge technology. Its dynamic character is highlighted by the minimalism of its lines, perfectly balanced throughout all the variants of the collection. The technological advances of the Nobili Widd® 28 cartridge can be seen and experienced during daily use of the mixer, helping to save both water and energy. Also available in the joystick version, encapsulates the union between the traditional form of the mixer and the pursuit of advanced design solutions.

YOYO

NEW

YOYO

Centro Stile Nobili

Essential harmony and contemporary simplicity: the Yoyo collection expresses character and personality through a soft and sinuous line, made possible by the Nobili Widd® immersion cartridge (with a diameter of just 28 millimetres) and emphasised by the concealed aerator, which defines its features and enhances its elegance.

SEVEN

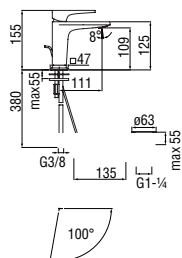

SEVEN

Meneghello Paoletti Associati

Balanced intervals between clean lines and soft surfaces decorate the bathroom with a silent yet strong marked character: a game between lights and shadows that manages to outline charismatic perspectives in its simplicity. Young and essential, Seven looks to the future with awareness through the best technologies for water and energy saving.

ACQUAVIVA

Centro Stile Nobili

Geometric proportions and cutting-edge technology. The new Acquaviva collection celebrates innovation through a modern captivating style, with lines that are neat and well-balanced in every detail and from all points of view. It uses the best available technology, starting with the adoption of the Nobili Widd® 28 cartridge with its mere 28 mm diameter, the most advanced technological expression in the sector in such a small diameter.

LOOP

Piet Billekens

LOOP

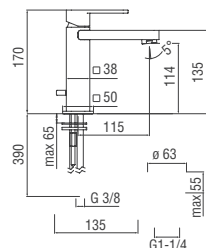

When the best technology is combined with aesthetics, the result is extraordinary. The pure design of the Loop collection pays exclusive homage to the technological efficiency from which it derives. Each line is a witness to absolute coherence and maximum quality in every detail. Our idea of design perfection reaches its highest peak: the Nobili Widd® 28 full-immersion cartridge sums up the best of technological research in its mere 28 millimetre diameter. Also present in the electronic variant, Loop illuminates the night with efficient intelligence.

RAY

Centro Stile Nobili

The rigid, minimalist volume of the body is in contrast with the sensual, cutting-edge lines of the mixing spout, giving life to innovative proportions and shape patterns. The state-of-the-art technology of the brand traces new standards, thanks to the fully robotised machining techniques on square section bars, capable of drawing linear forms and perfectly precise angles.

SOFI

Centro Stile Nobili

Majestic demeanour, formal styling. Classic lines, refined elegance: the Sofi collection re-invents the story of art and offers a wonderful encounter between tastes of old and modern inspiration. The absolute precision of the high-tech production department highlights the craftsman's touch down to the smallest detail, creating a continuous play of curves and corners.

LIRA

Piet Billekens

Innovative looks and echoes of refined classic style: the Lira collection reinterprets in minimalist key the traditional concept of double-control mixer tap. Its charisma is reflected in all the range through the cross-shaped handle, a detail that sums up, in the best manner, distinguished elegance that does not give up on the essential traits of contemporary luxury. Also present in the single-control variant and in a particular three-hole version in a reinterpretation of the cross-shaped handle summarized in a single line.

CARLOS PRIMERO

Piet Billekens

A perfect combination of classic and innovative elements. The Carlos Primero collection evokes stylistic and timeless suggestions of free and immortal tastes. And if the aesthetics are exciting, then so is the technology. The passion for innovation, which has always been part of the tradition of the Nobili brand, amplifies the technological evolution of the two-control mixer tap, reinterpreting the classic solutions of the past with a modern outlook.

GRAZIA

Centro Stile Nobili

Interplay of contrasts in retro style. Sensations of amiable tranquillity. The peace and wellbeing of a by now distant past: the sincerity of the Grazia collection revives the appeal of bygone days, mixing twentieth century style with technological innovation. The harmony of the proportions, the lustre of the chrome, the elegance and precious nature of the detail, highlighted by decorative inserts in the mixer tap knob.

RITZ

Centro Stile Nobili

Inspired by refined elegance and a taste of nostalgia, the Ritz collection generates natural sensations of tranquillity and inner peace. Formal equilibrium, a strong sign of a design beyond time and trends, expresses personality and a unique character. The passionate touch of the decorative inserts of the mixer tap knobs highlights the profound love for detail.

SAND

Centro Stile Nobili

The Sand collection re-employs the technological cutting edge of the Nobili Widd® 35 mm immersion cartridge after dressing it up in a modern and linear look that fits in with any setting. The combination of the two Nobili technologies saves water and energy, which means protecting the environment.

SKY

Centro Stile Nobili

The Sky collection puts everyone in agreement: the dual stylistic personality of the single control wash basin tap (available in two different versions, with the Nobili Widd® 28 or 35 mm cartridge) reflects the advanced know-how of our trademark, a leader in innovation and technological efficiency. A highly efficient heart, with eco-sustainable characteristics of the highest order, designed and manufactured in our own production facilities.

NEW ROAD

Centro Stile Nobili

The concept of the New Road collection is well and truly new. It not only chooses the stylistic tradition of a designer item, it also achieves a decidedly more ambitious objective - to offer a mixer that is more environmentally friendly than any other produced to date. The incredible water and energy saving attributes of the Nobili Widd® 35 Eco cartridge are an unambiguous symbol of our greatest passion: technological innovation.

SHOWER

UNIVERSAL, INTELLIGENT AND VERSATILE

The Wellbox flush fit thermostatic mixer is synonymous with cutting-edge technology: the safety cut-out prevents the risk of burns in the event of cold water suddenly running out. The mixer can be installed on plasterboard, either vertically or horizontally, and can be connected to the water pipes on the left side or on the right.

SHOWER

PROTECTIVE CAPS WITH INTEGRATED BUBBLE LEVEL

Wellbox has removable protective caps, designed to protect the internal mechanical parts. The integrated bubble level, which can also be removed to be positioned horizontally or vertically depending on the type of installation, allows for quick and precise installation of the flush-fit body.

MULTIFUNCTION BOX

The outer box of the Wellbox flush fit thermostatic mixer, designed to provide a perfect, soundproof seal, has 16 slots for possible mounting on plasterboard walls. It also has instructions for connecting the two inlets and marks for the tiling: in the event of an assembly error, it can be easily cut out.

INTEGRATED STOP TAPS

Two stop valves fitted with filters and positioned on the hot and cold water inlets allow routine maintenance of the product, such as cleaning or replacement of the thermostatic cartridge, to be carried out safely and quickly, without having to close the bathroom mains tap.

SEAL

A three-layer waterproofing membrane of the Wellbox flush fit thermostatic mixer (two outer polypropylene layers and an inner polyethylene layer) comes with the Wellbox flush fit body: designed to be placed between the adhesive and the tiles, it enhances the product's technical performance.

SHOWER

ZEN HARMONY

Plain, an aesthetic choice dedicated to the purest wellness experience: the large glass shelf, the true star of the scene, keeps the shower space tidy and accentuates the pattern of reflections of the chrome surface. The total adherence to the wall emphasises the attention to detail hidden in an extreme and sophisticated design.

SHOWER

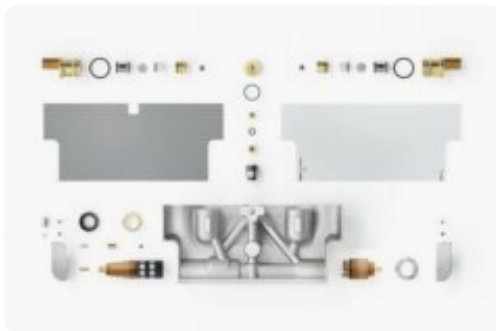

FUNCTIONAL SIMPLICITY

A simple and functional idea: Plain's scratch-resistant tempered glass panel with its dimensions (300 x 130 mm) makes it possible to keep within easy reach all the products dedicated to personal well-being, as well as the most essential accessories, while maintaining maximum cleanliness and elegance in the shower area.

THERMOSTATIC EFFICIENCY

Plain's knob hides the safety button with water temperature lock at 38 °C: the Nobile Thermotech® thermostatic cartridge, made using high-performance technopolymers, sets new standards in the industry by increasing the mixing speed and reducing the response time to sudden temperature changes.

STATE-OF-THE-ART CONSTRUCTION

Plain consists of a main brass body, machined from a solid bar: to build it, state-of-the-art equipment is needed with highly precise machining, which is carried out in the Mechanical Processing departments of the Nobile Technology Centre, the most advanced and efficient production complex in the entire sector.

FULL RANGE

The Plain range includes the external thermostatic mixer and the shower column, which is also equipped with thermostatic mixing: the extra-large swivel shower head (400 x 270 mm) echoes the style of the mixer body and ensures immediate well-being thanks to the large coverage area of the rain jet.

SHOWER

Shower

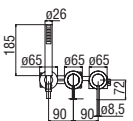

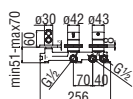

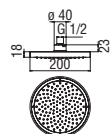

SHOWER SET

Centro Stile Nobili

Numerous compositions (with a single lever or with a 1- or 2-way thermostatic control valves) born with the aim of simplifying and speeding up the decision process when choosing from the vast range of shower solution possibilities. Each supplementary accessory is marked by a meticulous design, aimed at maximizing the overall effect.

THICE

Centro Stile Nobili

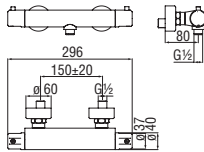

Particularly suitable when there are children around, the Thice shower columns and external thermostatic mixer, with «frozen body» technology, can isolate the external surface of the mixer so that it is always cool, even if the water temperature rises. This is achieved through an inner core of plastic material with ultra-high efficiency.

TEA

Centro Stile Nobili

In everyday items, the search for form sometimes pushes function back into second place. The Tea shower columns and the external thermostatic mixer re-establish the balance between concept and function without yielding to styles or trends, simplifying shapes and maximising the comfort provided by the Nobili Thermotech® thermostatic technology.

OPERA

Centro Stile Nobili

Like a symphony, elliptical sections are repeated in the design of each detail: Opera offers an original, elegant form, free of invasive elements. All the components of the column (shower head 300 x 200 mm, arm and hand shower) echo the oval profile of the thermostatic body, giving life to a result that is faithful to the balance of symmetries that lies at its core.

COMPONENTS

Centro Stile Nobili

The feeling of freedom stems from the wellbeing instilled by the shower setting. We each cultivate our own tastes and personal needs: for this reason, we also offer all shower items loose, in order to be able to satisfy individual needs and personal preferences in the simplest possible manner. Forget convention and common causes, create your own personal show in the shower setting.

TOUCHLESS

The infrared range is available in cold water or temperature-controlled versions: the infrared sensor avoids direct contact with the mixer and makes its use more hygienic. When hands are placed near the mixer, the flow is automatically activated: as soon as movement is no longer detected, the flow stops completely independently.

VARIOUS
ITEMS

INFRARED SENSOR

To activate the flow of the infrared range mixers, placing the hands close to the sensor located on the tap body is enough: in order to avoid bacterial growth, after a 24 hour inactivity period, water flows for a 30 second interval, ensuring the product is fully self-sanitised.

SOLENOID VALVES

Quick and easy: the operation of the infrared-controlled tap is managed by a small box containing the lithium battery pack and the solenoid valves for opening and closing the water flow: once positioned under the washbasin top, it is well protected and hidden from view.

VARIETY OF SHAPES AND FINISHES

The infrared tapware range is available for four collections: Velis, Loop, Live and Mia. The right model for every single need can be found among the items in these collections. Velis also includes basin and wall-mounted models, which are also available in all the finishes of the collection.

COLD WATER OR MIXED FLOW

Every model of the wide range of mixers with infrared control is available in two configurations: the cold water version allows the simple supply of a single flow, while the models with temperature control have a knob that can mix the two flows of hot and cold water.

VARIOUS
ITEMS

STAY SAFE

Nobili's cutting-edge technology meets the most advanced hygiene safety: we use Biomaster technology, an antibacterial protection based on silver ions that can inhibit the growth of bacteria by up to 99.99%, becoming an integral part of the product and providing effective, long-lasting protection for the life of the mixer.

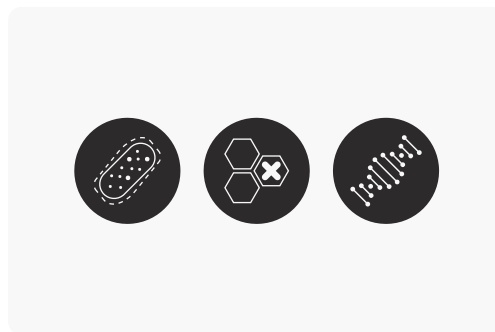

VARIOUS
ITEMS

WHAT IS BIOMASTER?

Biomaster is a silver ion antimicrobial powder that can inhibit bacterial growth by up to 99.99% and last the lifetime of the product. The inorganic nature, small particle size and high temperature tolerance of this additive make it ideal for use in a wide range of applications.

HOW DOES IT WORK?

When bacteria come into contact with a surface treated with Biomaster, the silver ions prevent them from growing, generating energy or reproducing, and so they die. The active ingredient therefore provides maximum antibacterial protection throughout the life of the treated product.

IS THE RESULT CERTIFIED?

Yes, we performed tests at the 3A Laboratori S.r.l. laboratories (ACCREDIA accreditation no. 1165). The tests were carried out in compliance with the ISO 22196:2011 technical standard and showed a very high percentage of bacterial activity reduction (Staphylococcus aureus: 99.87% / Escherichia coli: 99.99%).

FOR HOW LONG IS THE TREATMENT EFFECTIVE?

The most advanced hygienic safety, for an extraordinary result: the treatment is considered effective for the entire life cycle of the mixer, it has passed neutral salt spray tests (200 h) and has no harmful effects. The surface finish is not altered in terms of aesthetics, nor does it smell different from the standard.

GRIDS FOR FLOOR

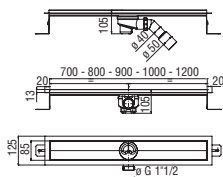

Centro Stile Nobili

An innovative solution for the shower setting, with drain channels to satisfy the needs of the modern bathroom: two syphon versions (85 and 105 mm), six styles (five grids with different patterns plus one tileable), five available sizes (70, 80, 90, 100, 120 cm) in addition to the option of a modular installation by creating a continuous line of single units.

Renovation

RENOVA

Centro Stile Nobili

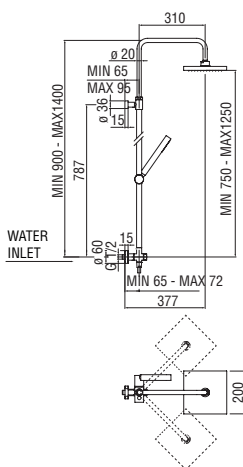

Dedicated to the renovation of shower areas with no brickwork operations, the Renova columns are suitable for the quick and easy replacement of single jets (riser rail or shower head) with a two-way system. The incorporated deviator provides a choice of fixed or manual shower head, while the telescopic rail makes it adaptable to any setting.

KITCHEN

Kitchen products are a cornerstone of our product range. We put a great deal of effort into the aesthetics and functionality of our kitchen items and offer our customers - primarily kitchen manufacturers, but also architects and interior designers - an almost unlimited range of solutions.

KITCHEN

KITCHEN OVERVIEW

A range of models, of different type and with different functions, meet the need for ergonomics and reliability through innovative solutions with a clear stylistic identity, resulting in evocative looks underscored by production excellence to enhance the sink top and ensure the best user experience.

LIGURIAN FLAVOUR

It's instant, a 360° love: the intuitive spirit of Levante suggests its comfort and convenience. The hand shower's vast range of action, located in the opposite position to conventional mixers, and the ease with which it can be picked up with one hand thanks to its magnetic anchorage, permit total freedom of movement on the sink surface.

KITCHEN

NOBILI WIDD® 28 CARTRIDGE

Levante houses a unique technological jewel, the Nobile Widd® cartridge: designed and manufactured in the Nobile Technology Centre, it achieves first-class eco-sustainability goals, helping to save water and energy. The top quality materials used guarantee maximum comfort and unequalled reliability.

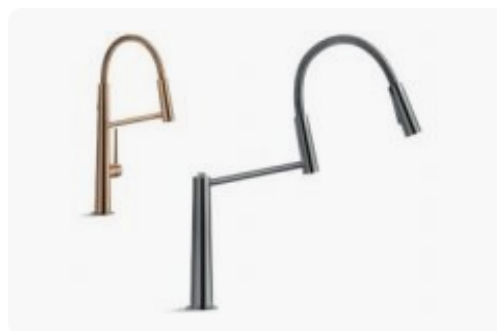

DEDICATED TO THE PLANET

A mixer created with the sea and nature in mind cannot fail to protect the environment. Opening the supply directly to cold water prevents the boiler from turning on and releasing carbon dioxide into the atmosphere, while the flow limiter brakes the opening of the lever, helping to reduce water waste.

FRONT ROTATION

The innovative movement system and the absolute stylistic purity make Levante's design unique and exclusive: a distinctive feature is the front position of the hand shower's centre of rotation (opposite that of traditional sinks). This novel solution doubles the mixer's range of action.

IRRESISTIBLE CHARM

The new Red canyon PVD and Diamond smoke PVD finishes, manufactured in the Nobile Technology Centre, with their bright and striking tones, ensure high technical performance thanks to a state-of-the-art, scratch and wear-resistant surface treatment, ideal for preserving the mixer's spectacular appearance.

ABSOLUTE ELEGANCE

Heron: an overall balanced, weightless design, dressed in an elegant minimal guise destined to retain its timeless charm. Iconic elements and refined details, enhanced by the Velvet black finish paint, underline the linearity of the slender shape, created using the most recent version of the Nobili Widd® cartridge with axial mixing.

NOBILI WIDD® 2020 CARTRIDGE

The excellence of our research and development laboratories has produced the full-immersion Nobili Widd® 34-millimetre cartridge with axial movement, which can revolutionise the structure of traditional mixers by eliminating the side cartridge block and giving life to an extremely clear, streamlined profile.

TURNING ON WITH COLD WATER

Opening the supply directly to cold water prevents the boiler from turning on and releasing carbon dioxide into the atmosphere: to activate the hot water, you must make a conscious gesture by turning the knob to the right. Furthermore, the flow limiter brakes the opening of the lever, helping to reduce water waste.

ERGONOMIC LEVER

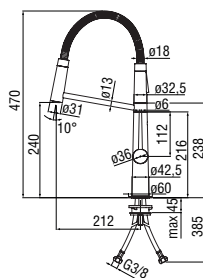

Designed to ensure a pleasant user experience in the kitchen environment, Heron features a mixing lever with a strong character: its ergonomic design echoes the style of the bridge supporting the hand shower, while the hollowed-out indentation at its end allows it to be gripped quickly and easily.

ADJUSTABLE 2-JET HAND SHOWER

Heron's adjustable hand shower with two jets (spray and rain jet) allows the greatest possible freedom of movement at the sink: it can be easily and quickly attached to the mixer's support bridge thanks to a small magnet, even with one hand, thus greatly enhancing the user experience.

Kitchen

MATCH

Centro Stile Nobili

Unmistakable from the very first glance, exclusive at first touch: the balance of material hints sublimates scientific research to the concept of architecture. Between aesthetics and performance, visual and tactile sensations are created in Fenix®, the innovative material par excellence, crossing the limits of kitchen design. The complete opacity of Fenix® ensures a super matte effect that is extremely functional - antibacterial, anti-mould, hydro-repellent and dust-repellent. Pleasantly soft to the touch, it is the result of the most advanced nanotechnology engineering, aimed at finding a durable, heat-resistant surface with a unique aesthetic impact.

Finish variants

Inox

Velvet black

KITCHEN

CHROME AND FENIX NTM®

The best equipment and the most advanced technology, in order to achieve a flawless and fascinating chrome finish, in full compliance with the strictest environmental regulations. The extreme brilliance and gloss of the mixer surface contrasts sharply with the absolute opacity of the Fenix NTM® coating.

GRIGIO BROMO

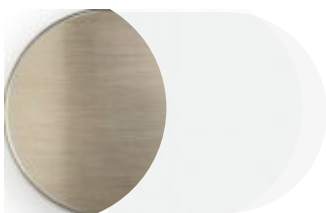

ROSSO JAIPUR

NERO INGO

INOX AND FENIX NTM®

A shade that enhances temperament through detail, designed with the most up-to-date and sophisticated kitchen environments in mind: the irresistible coolness of the Inox finish leads to contemporary atmospheres with essential charm. The clear design of Match leans towards pure minimalism, idealised by the nuances of the surface.

TECHNOLOGY CENTRE

Technology and quality, the strengths behind all our choices, from the 1950s to the present day: Nobili, the only European company in the sector with a fully integrated production cycle, is stable as a leader in the industry. It is in the highest position for research activities and, above all, for the level of technological evolution of its production systems.

FOUNDRY

One of the areas that, together with the turning unit, represents the moment when everything takes shape: the low-pressure robotic Foundry department, where 20 machining units produce more than 780,000 components every year, reducing material waste to zero and not damaging the environment.

MECHANICAL MACHINING

120 facilities produce more than 28 million components a year from a bar of brass, in an environmentally friendly manner without waste: all stages are controlled by an electronic system that guarantees absolute precision, an essential element for furnishing the most prestigious homes and hotels in the world.

POLISHING

After the Foundry and Machining phases, the components are thoroughly washed and then move to the Polishing department: in this area, 110 fully automated stations process more than 6 million components per year, coordinating the automation of the robots with the great experience of the dedicated operators.

THERMOPLASTIC MOULDINGS

Plastic components play a fundamental role: the cartridge, in particular, is made using special food-mix plastic that is completely free of toxic elements. A department of excellence with 18 presses, processing more than 15 million components per year, non-stop (24 hours a day) and with no waste.

CHROME PLATING

The best equipment and the most advanced technological resources available, in order to achieve a glossy and brilliant finish and to guarantee the greatest sustainability, thanks to total control in the management of the substances used: the best way to protect the environment and the operators' health.

PVD TREATMENT

Innovative method for finishes that allows the creation of very high quality surfaces in terms of aesthetics (uniformity, flexibility, range and brilliance of colours) and in terms of resistance to abrasion and maintenance of aesthetic characteristics over time, for complete customer satisfaction.

CARTRIDGE AND PRODUCT ASSEMBLY

Assembly starts from the heart of the mixer, where state-of-the-art machinery packs an average of 10,000 cartridges every day. 2,600,000 items are assembled every year on 23 assembly lines, supported by 20 product-marking laser stations which are involved after the items have passed all quality controls.

STORAGE AND SHIPPING

Dedicated to the customer: after assembly, testing and packaging, each item is stored in the warehouse, an area that can hold over 1.24 million products. This apparatus, which is supported by a very advanced management system, optimises order processing times, significantly improving customer service.

INTERNATIONAL CERTIFICATIONS

Every Nobili mixer is designed and manufactured in-house, complying with the strictest international standards and guaranteeing utmost quality, safety and respect for the environment. For more information on which articles have obtained one or more certifications, please visit our official websites or write to qualita@nobili.it

NF

Europe's leading French certification, it guarantees the excellence of the chosen products and services. Issued by the CSTB laboratory, it certifies the compliance of products and services with national, European and international normative documents (such as standards) and (if relevant) technical specifications for an even higher certification quality. It helps professionals promote their expertise and allows consumers to shop with confidence.

ACS

The ACS Sanitary Conformity Certification is a system developed by the French health authorities to certify sanitary conformity: it is used to assess if a product is suitable for coming into contact with drinking water, in accordance with the French decree of 29 May 1997 and later updates. The decree applies to plastic items and accessories containing at least one plastic component in contact with drinking water.

WATERMARK

For Australia and New Zealand, WaterMark Certification includes tests on the elements of the conduction systems, ranging from microbiological tests on the suitability of the elements for contact with drinking water, to mechanical and physical tests on the assembled material, following the guidelines set by Australian regulations. It is essential to ensure the suitability of devices for drinking water in Australia, both during installation and use.

DVGW

The DVGW Testing and Inspection Service is aimed at companies that manufacture products that come into contact with drinking water, in order to support them when placing the products on the German market. The DVGW mark is also one of the best known in the world and can facilitate access to markets beyond the German-speaking area (Austria, Switzerland, Slovenia, North-East Europe), representing a guarantee of absolute quality on a global level as well.

SINTEF

Designated body for the technical control and approval of construction products. It contributes to guaranteeing quality, values and environmental protection through approval and certification schemes: solutions, materials and construction elements are therefore approved and certified according to national and international standards, rooted in knowledge based on study and research in various national laboratories.

ETA

ETA Danmark draws on more than 40 years of experience in the approval of construction products in Denmark. It issues MK approvals for materials and structures and VA approvals for water and drainage equipment, assessing whether or not the product meets the requirements of the Danish Building Regulations and relevant documents, providing customers with a recognised assessment of the product's properties in relation to its intended use.

KIWA

Safety, efficiency, sustainability and performance are required in every marketed service or product, which often must comply with international laws, regulations and standards. The certification services of Kiwa (an international quality body) are accredited and can be integrated with one another. They respond to the increasingly precise requirements of an ever-changing society, supporting companies as they innovate and grow at national and international level.

SVGW

Since 1873, the SSIGA (Swiss Society of the Gas and Water Industry) has been a national, non-profit technical and professional organisation and is now a nationwide presence. As an organisation of knowledge, professionalism and of the network of Swiss distributors of gas, district heating and water, the SSIGA makes an important contribution to the safe and sustainable supply of gas, heat and drinking water.

CSA GROUP

A worldwide leader in research, development, education and standards advocacy, the CSA Group (Canadian Standards Association) is a global organisation dedicated to safety, social good and sustainability. The organisation's mission is to improve life (especially in the areas of safety, health, environmental protection and economic efficiency) through the advancement of standards in the public and private sectors.

BELGAQUA

Professional association grouping the three regional associations representing the water sector in Belgium: Aquabru in the Brussels-Capital Region, Aquawal in the Walloon Region, Aquaflanders in the Flemish Region. Together, these regional associations bring together 38 companies and/or services for the production and supply of drinking water, as well as services for the treatment of urban waste water in the Flemish, Walloon and Brussels-Capital regions.

PZH

The PZH - PIB National Institute of Public Health, the oldest public health institution in Poland, was created as a scientific and laboratory base for the health service. From the outset, it was conceived according to the vision of Ludwik Rajchman (first director of the Polish National Institute of Hygiene in 1918-1932 and later co-founder of UNICEF) as a modern institute with specialist activities covering the fundamental areas of public health.

WRAS

WRAS (Water Regulations Advisory Scheme) certification is issued by a recognised British body when a product complies with standards set out by BS (British Standard) regulations. The production process must ensure that the produced item is in conformity with the approved product. The certification process differs depending on whether the product is a finished product or a raw material, as well as on the type of material.

GENERAL TERMS OF SALE

We have always believed in trading relations in which every negotiation is based on values such as trust, honesty and reliability, just as we believe in qualified and professional working methods. In order to easily retrieve all the information needed to complete the order, the General Terms of Sale are included below in full detail and divided by specific topic.

These General Terms of Sale (hereinafter «GTS») of the company Carlo Nobili Spa Rubinetterie (hereinafter «Nobili») apply to any order made to Nobili by a professional buyer (hereinafter «the buyer») for all the deliveries made to all the countries Nobili exports to. Any order for products or provision of services implies, as an essential and decisive condition, the acceptance by the Buyer, without reservation, of these GTS, which are the basis for the sales negotiations, in compliance with the provisions of the articles of the Code of commerce in force in the various countries, and the related waiver by the Buyer of any other contrary condition, of all the general or special conditions of the Buyer, including any purchase conditions and the purchase orders, the reference contracts and the sales operating contracts, each time these conditions and/or contracts have not received Nobili's prior written consent. The sales negotiations between Nobili and the Buyer must be carried out with mutual respect for the interests of the Parties, fairly and in good faith, as well as in compliance with the articles of the Code of commerce in force in the countries Nobili exports to. In case the latter provide for the submission or attempted submission to obligations that generate a significant unbalance in the rights and obligations of the Parties, Nobili may not in any case grant sales advantages or special sales conditions that are not subject to an equivalent and balanced counter-entry by the Buyer. These GTS may be amended at any time, notwithstanding the fact that any possible amendment will be notified to the Buyer and will take effect from one (1) month from receiving the notification.

PRICES

The prices stated in this Price list are approximate and intended for wholesalers. They are intended net of taxes and are expressed in Euro ex-works. This Price list cancels and replaces all the previous editions, notwithstanding errors and omissions. The Price list represents the most up-to-date reference tool. Any errors in this Retail price list do not provide grounds for complaint. Any order made implies the acceptance of all the sales conditions reported below. Nobili reserves the right to increase the prices at any time, in particular in case of an increase in production costs linked to an increase in the price of raw materials. The new price lists will be sent to the Buyer upon request. In this case, the new price lists will be sent to the Buyer two (2) months prior to their enforcement. Orders below 100.00 € net of taxes will be associated to the corresponding order processing costs (which include the entry, preparation and shipping of the order) equal to 30.00 €. Additional costs deriving from shipping via express delivery are on the Buyer's account.

PRODUCTS

1. The products subject to these GTS are defined with reference to Nobili catalogues. However, the latter may not constitute contractual documents under any circumstance. All the information reported in the catalogues, brochures and price lists is approximate only and commit Nobili only following its written confirmation.

2. Products are manufactured with the highest precision possible, notwithstanding the tolerances used in the sector in question. Nobili reserves the right to unilaterally modify the features of the products sold, based on improvements recommended by its services, and with no obligation to modify previously delivered products (or in pending orders), and without the prints, descriptions and information reported for advertising purposes on Nobili commercial documents being disputed against Nobili.

ORDERS

Orders are subject to acceptance by the company and are understood to be subject to the established conditions of sale. Orders are intended as accepted at the prices and conditions in force on the date of the order, with acceptance subject to Nobili's approval. Orders and amendments to orders communicated verbally and by telephone must be confirmed by the customer in via post, fax or e-mail. Any cancellations may be authorised only with the prior written approval of Nobili, which reserves the right to apply any relevant penalties or reserves the right to refuse them. Nobili does not accept orders below 100.00 € net of discounts. For lower amounts, Nobili will invoice transport costs for 25.00 € for the standard service and 40.00 € for the 24 hour delivery Express Saver service. The customer must confirm in writing whether it wishes to use this special service. An additional amount of 30.00 € will be invoiced for management costs. Nobili reserves the right to ask the Buyer for full payment upon making the order. The order will be considered certain and definitive only after the collection of the invoiced price by Nobili. Finally, Nobili reserves the right to request, also during the execution of the commitments of the Buyer, any refusal that authorises the cancellation of all or part of the orders made.

DELIVERIES / TRANSPORT / TRANSFER OF RISKS

1. Unless otherwise specified, the delivery will be made to the address specified by the Buyer at the time of the order. Regardless of the product shipping method, and deviating from the clause of retention of title established in the GTS below, the risks and hazards are transferred to the Buyer when the goods are handed over to the first courier. If the shipping is delayed due to the behaviour of the Buyer or due to a cause outside Nobili's control, the transfer of the risks will take place at the time of the communication by the Buyer of a product supply notification.

2. The delivery delays mentioned in the order confirmation are stated exclusively by way of example, depending on the availability of the products and the transport, unless it is expressly mentioned that these delays are to be considered mandatory.

3. The delivery terms possibly accepted by Nobili are suspended in their own right following any event that is out of Nobili's control and causes a delay in the delivery, and in particular in cases of force majeure. Force majeure refers to any event that is beyond Nobili's will or the will of one of its suppliers, unpredictable and unstoppable, of any kind, natural disasters, epidemics, bad weather, sabotage, embargoes, strikes, accidents, interruption or delay in the transport and supply of raw materials, energy or components, incidents affecting the machine tools, making the contract impossible to be executed whether temporarily or definitively. The list of the cases of force majeure is not limiting. Nobili will inform the Buyer in case an event of force majeure occurs. In this case, the stated delivery terms will be automatically extended proportionally. If, despite the efforts made, Nobili found it impossible to deliver the ordered goods due to force majeure, Nobili will be exempted from its delivery obligation.

4. Under no circumstance can delays in the delivery be subject to Nobili's responsibility. Therefore, delivery delays may not give rise to penalties, compensation, order cancellation, delivery refusal, suspended invoice payment, unless otherwise agreed by Nobili before hand. This is despite the existence of clauses to the contrary in the purchase conditions of the Buyer. In any event, only the prejudice actually suffered by the Buyer, as demonstrated and assessed, may be subject to claim for compensation, which may in any case be submitted only subject to negotiation with Nobili and agreement between the parties. If no agreement can be found, the prejudice will be estimated by an expert entrusted by the Novara commercial court upon the request of the most diligent party.

5. Nobili is authorised to proceed to partial deliveries and billing, before the set delivery term expires and according to reasonable proportions.

6. Should the delivery be delayed on the Buyer's request, the warehousing expenses and the current interest on the capital invested to allow the warehousing will be billed by Nobili for a minimum amount of 1% for each month of delay, calculated on the amount of the invoice, taxes excluded. Upon the expiry of the later term agreed between the Parties, Nobili reserves any right on the products and the right to guarantee the delivery of other equivalent products by a suitable extended term. Any change to an order that is made while the order is being executed, even if accepted by Nobili, implies an extension of the set delivery term according to the methods communicated by Nobili to the Buyer.

7. The Buyer must verify the products at the time of receiving them and immediately express any reservation according to the conditions established under these GTS. Any complaint will be taken into consideration only if the goods are still in the same status they were in when delivered.

8. For items not in stock with a special finish, the estimated delivery time is eight weeks ex-works.

EXCLUSION OF PENALTIES

Since the penalties are meant at remedying a prejudice resulting from the violation of a contractual obligation, Nobili refuses the systematic and arbitrary invoicing of penalties predetermined by the Buyer that, by their very own nature, are not proportional to the prejudice that may have been suffered by the latter, and this despite all the clauses and provisions to the contrary that may be stated in purchasing conditions, annual economic-financial plans, reference contracts, logistic conditions, etc. by the Buyer. As a consequence, no penalty of any nature may be invoiced or deducted by the Buyer from a balance of products without Nobili having been able to verify that the violation and the prejudice claimed by the Buyer exist, by virtue of the articles of the Codes of commerce in force in the various countries Nobili exports to and without Nobili having given its own prior written relevant consent. To this end, the Buyer shall provide Nobili with all the documents aimed at allowing a comparative analysis of the violation claimed and stating the prejudice actually suffered. Nobili will have sufficient time to analyse the documents sent and inform the Buyer with regard to its agreement or disagreement with the violation claimed and the extent of the compensation demanded. Any direct charge by the Buyer that violates these provisions will be assimilated to a payment incident that will authorise Nobili to refuse any new product order and suspend any delivery under way after having notified the Buyer, or suspend the balance of rebates and other financial advantages, up to closing the Buyer's account. Nobili reserves the right to deduct rebates or any other payment due to the Buyer or any amount that the Buyer deducted compulsorily without Nobili's prior written consent.

CLAUSES OF RETENTION OF TITLE

Our sales are finalised upon the delivery of the goods; however, the title will be transferred to the Buyer only subsequently to the actual and complete payment of the invoice. Risks are transferred at the time of the delivery and the Buyer must guarantee the goods against any risk, including those of unforeseeable circumstances or force majeure. The Buyer and its insurer forgo in advance any appeal against Nobili. Nobili authorises the resale of the material delivered before the integral payment of the price, without waiving its property right. Therefore, Nobili reserves the right to take back, in case of failed payment of all or part of the price due or that has become due, its own-brand material still in stock at the time of the non fulfilment. The material taken back may be any element in stock coming from Nobili, even if the material taken back was not the one concerned by the failed payment. In the absence of material still in stock at the Buyer, Nobili may look, with any means it deems appropriate, for sub-buyers of its own goods or demand from them the balance from the transfer of the receivable from the main debtor in favour of Nobili, being acquired compulsorily in case of applying this clause. Should Nobili's material be resold together with other goods that do not belong to Nobili, our customer will be considered as having transferred its receivable to Nobili, though only until reaching the amount of the price or part of the price of Nobili's goods not paid for yet. In case of failed payment of all or part of the price upon the agreed expiry, Nobili will be entitled, at its exclusive jurisdiction and subject to simple notification, to exercise its claim right, which will imply the forfeiture of any term allowed, the payment of default interest due automatically from the date of expiry and without the need for any order, calculated at the legal interest rate increased by 50%, as well as the chargeability of all the expenses of any nature incurred to actually recover the goods, with the resale be settled under the conditions below, only in case of non fulfilment of the obligations by the Buyer. Alternatively Nobili may terminate the sale 3 days after sending a registered letter with return receipt notifying the Buyer about the order to pay the price or the balance for the price, interest and expenses as specified above, remained void, or resort to such termination simply for the simple fact that the claim lodged did not result in the fulfilment of the obligations of the Buyer. In all the cases of termination, any pre-payments will be retained by Nobili with regard to both product depreciation and as penalty clause, notwithstanding any other compensation, particularly in relation to amicable initiatives and diligence or that will have been needed for the recovery.

CUSTOMER IDENTIFICATION DATA

The customer is responsible for all identification data supplied to Nobili such as, for example: company name, registered office, VAT Reg. number and all the other data requested specifically by current legislation. The customer's data, pursuant to the laws in force in the various countries Nobili exports to, will be retained and processed in order to comply with legal obligations. All the other uses must be accepted by the customer.

PACKAGING AND SHIPPING

Packaging is prepared by highly specialised personnel. Nobili declines any responsibility. Goods travel at the customer's risk and peril. The recipient is expected to check the goods delivered and promptly inform the carrier of any damage at the time of receipt, informing Nobili via recorded delivery (even if this has been chosen by Nobili). Unless otherwise agreed, transport costs will be paid by the customer.

PAYMENT AND DELAYS

1. Any delivery subsequent to an order by the Buyer will result in the issue of an invoice. Invoices are payable to Nobili Italia within forty five (45) days from the date of the invoice, via wire transfer, except in case of special conditions agreed between Nobili and the Buyer. All the payments shall be made net of the commissions. In case of payment via cheque, the Buyer shall bear any discount, collection and other banking expense. Payment will be attributed first of all to the costs, then to the interest and finally to the main receivables with the longest term.
2. In case of failed payment upon expiry, by virtue of the articles of the Code of commerce in force in the various countries Nobili exports to, the payment of default interest will be due in full and without notice, calculated on the basis of three (3) percent of the legal interest rate and a minimum of nine (9) percent annually, to the full extent and without recourse, the day after the expiry date stated in the invoice, until the day of full settlement.
3. The failed payment, also partial, at just one of the expiries agreed for any of the deliveries will also imply the forfeiture of the total term of the current expiries.
4. In no case may the payments due to Nobili be suspended or subject to any reduction or offsetting on the exclusive initiative of the Buyer, since Nobili's prior written approval is indispensable, and this regardless of any contrary provision that may be included in the Buyer's purchasing conditions. Any offsetting not authorised by Nobili will be assimilated to a failed payment, which will authorise Nobili to refuse any new product orders as well as suspend the deliveries under way.
5. In case of delayed or failed payment, despite the orders to pay sent, Nobili reserves the right, in relation to any future order, to enforce the payment guarantees as well as ensure that the delivery of the ordered goods only takes place only upon full payment of the order. For the orders to pay remaining without effect, Nobili may request the sale revocation, demand immediate payment for the delivered goods, suspend any delivery and/or cancel any orders under way until all the sums due are settled in full. In case of revocation, the Buyer must refund Nobili all the costs linked to the conclusion of the contract as well as the lost earnings. In case of failed total or partial payment at even just one expiry, Nobili may recover the goods sold, notwithstanding their ownership by virtue of the provisions under the relevant paragraph of these GTS.

RESPONSIBILITIES

All items forming part of our production are thoroughly tested. Damage caused by an incorrect installation or improper use is not covered by the guarantee, unless otherwise specifically agreed between Nobili and the Buyer. Nobili does not accept returns of goods. However, in case of an authorised return, such return must be on the customer's account. If the material is truly defective, Nobili's liability is limited to replacing the parts, with no compensation due for any direct and indirect damage caused by the use of our products. Customers are forbidden to perform any type of mechanical intervention on our products.

COMPLAINTS

Complaints must be sent within eight days from receiving the goods with written confirmation. Any type of return of material must be approved in writing by our marketing management, subject to the presentation of a list of materials with the reason for the return, using the Nobili sheet available on the website www.nobili.it. The return expenses are on the customer's account notwithstanding any specific agreement between Nobili's marketing management and the Buyer. In the case of return of a new and unused product ordered by mistake, the return will be on the customer's account and Nobili will apply a deduction equal to 50% of the value of the product invoiced at the time of the first shipping.

DISPUTES

The Court of Novara will have exclusive jurisdiction to settle any dispute that may arise.

GUARANTEE

All products manufactured by Carlo Nobili S.p.A. Rubinetterie are subject to controls in every phase of the production process and are guaranteed for a period of 5 years from the purchase date (2-year European warranty + 3-year free warranty extension offered by Nobili). Coloured and electronic products are guaranteed for 2 years, while Nobili Widd® 35 and Nobili Widd® 28 cartridges are guaranteed for 20 years. In any case the invoice date will apply. In the absence of an invoice, the installation will be deemed as taking place within a maximum of 4 weeks from the delivery of our products to the Buyer. Standard or sample products ordered under Expo conditions may be subject to shortfall claim exclusively on the condition that the request is received by Nobili within seven (7) calendar days from the delivery date to the customer, any in any case subject to validation by our technical service.

The cases listed below are covered by the guarantee:

- Casting, porosity and chrome-plating defects.
- Repair or replacement of products with manufacturing defects acknowledged as such by our technical office.

On the other hand, the guarantee will not be valid in the following cases:

- Errors during installation and application of the product.
- Deterioration of the chromed surface due to the use of cleaning products containing acids or abrasive substances.
- Presence of foreign bodies borne by water (sand, filings).
- Deterioration of the surface presenting finishes other than chrome. The duration of the products is subject to the type of care and gentle use.
- Deterioration of the taps due to incorrect installation.
- Incorrect use of the product.
- Repairs and maintenance performed in an incorrect manner and without the prior authorisation of Nobili.

The guarantee by Nobili cannot be renewed.

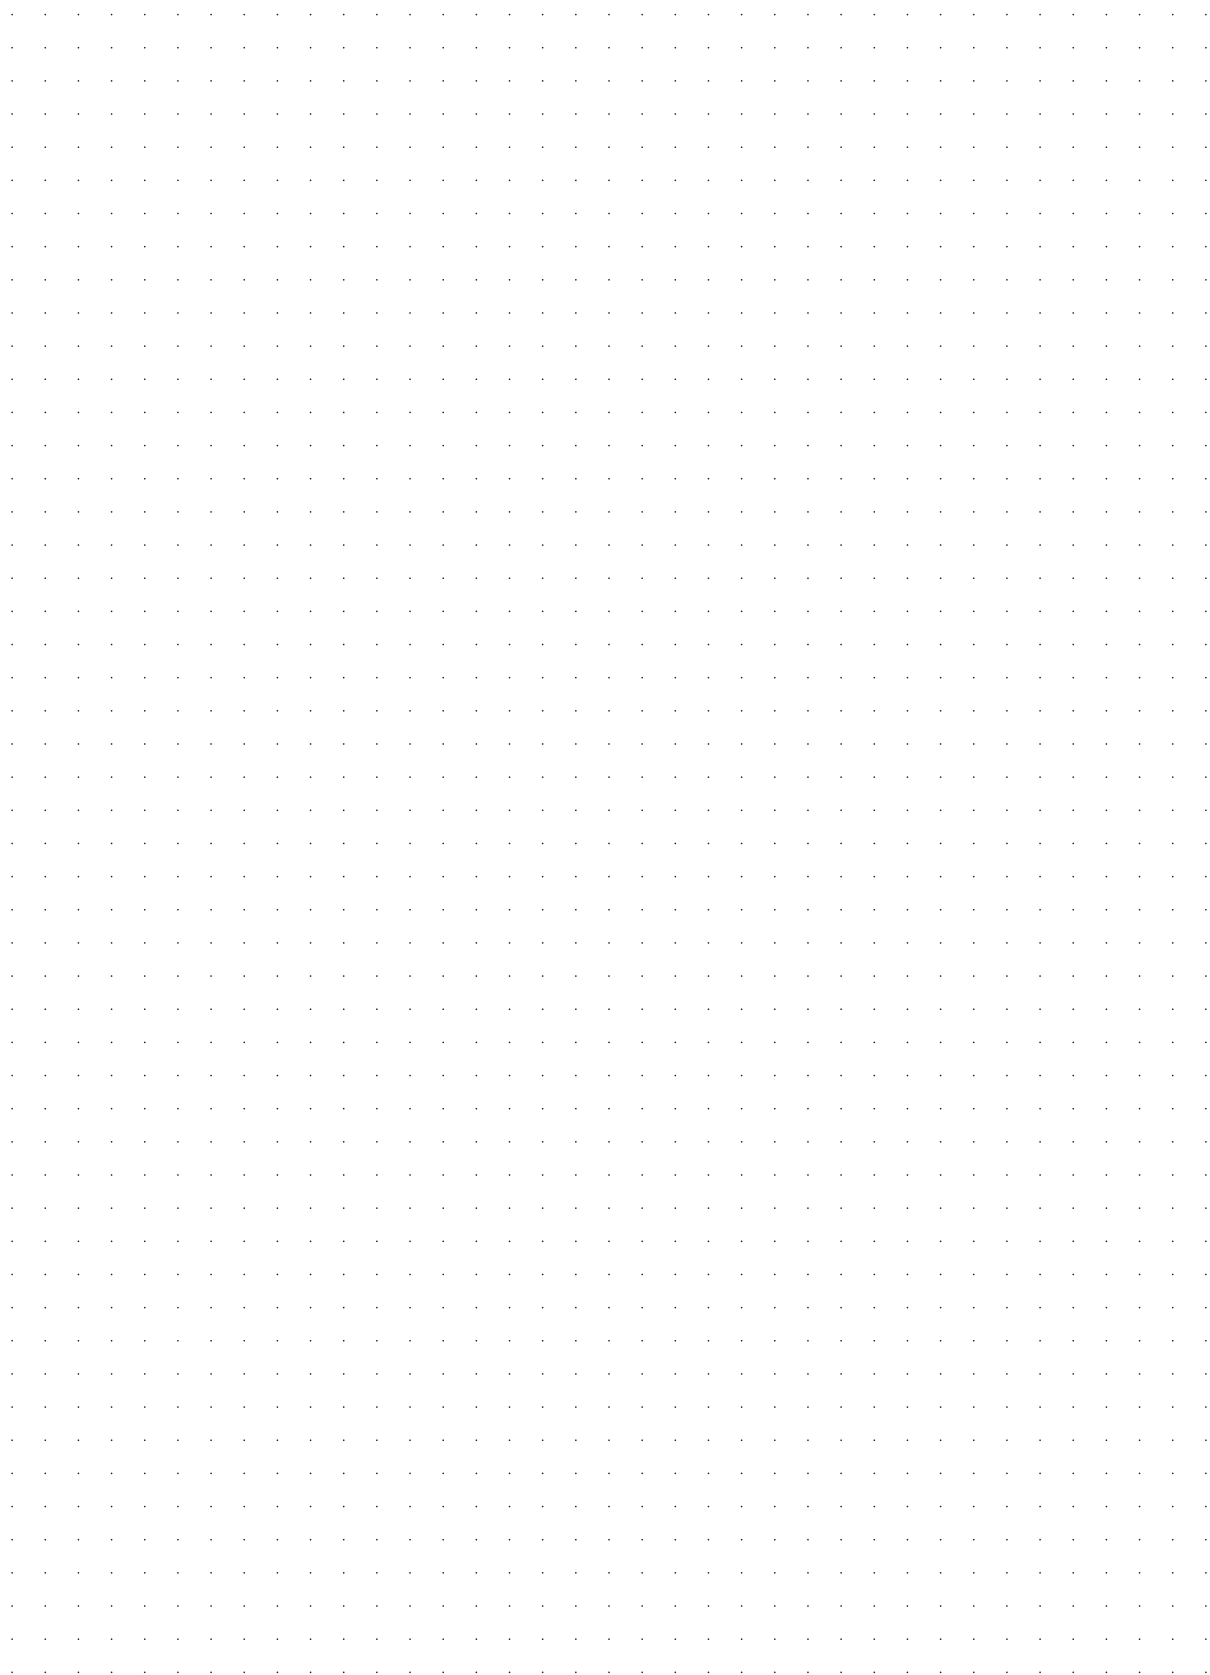

CLEANING

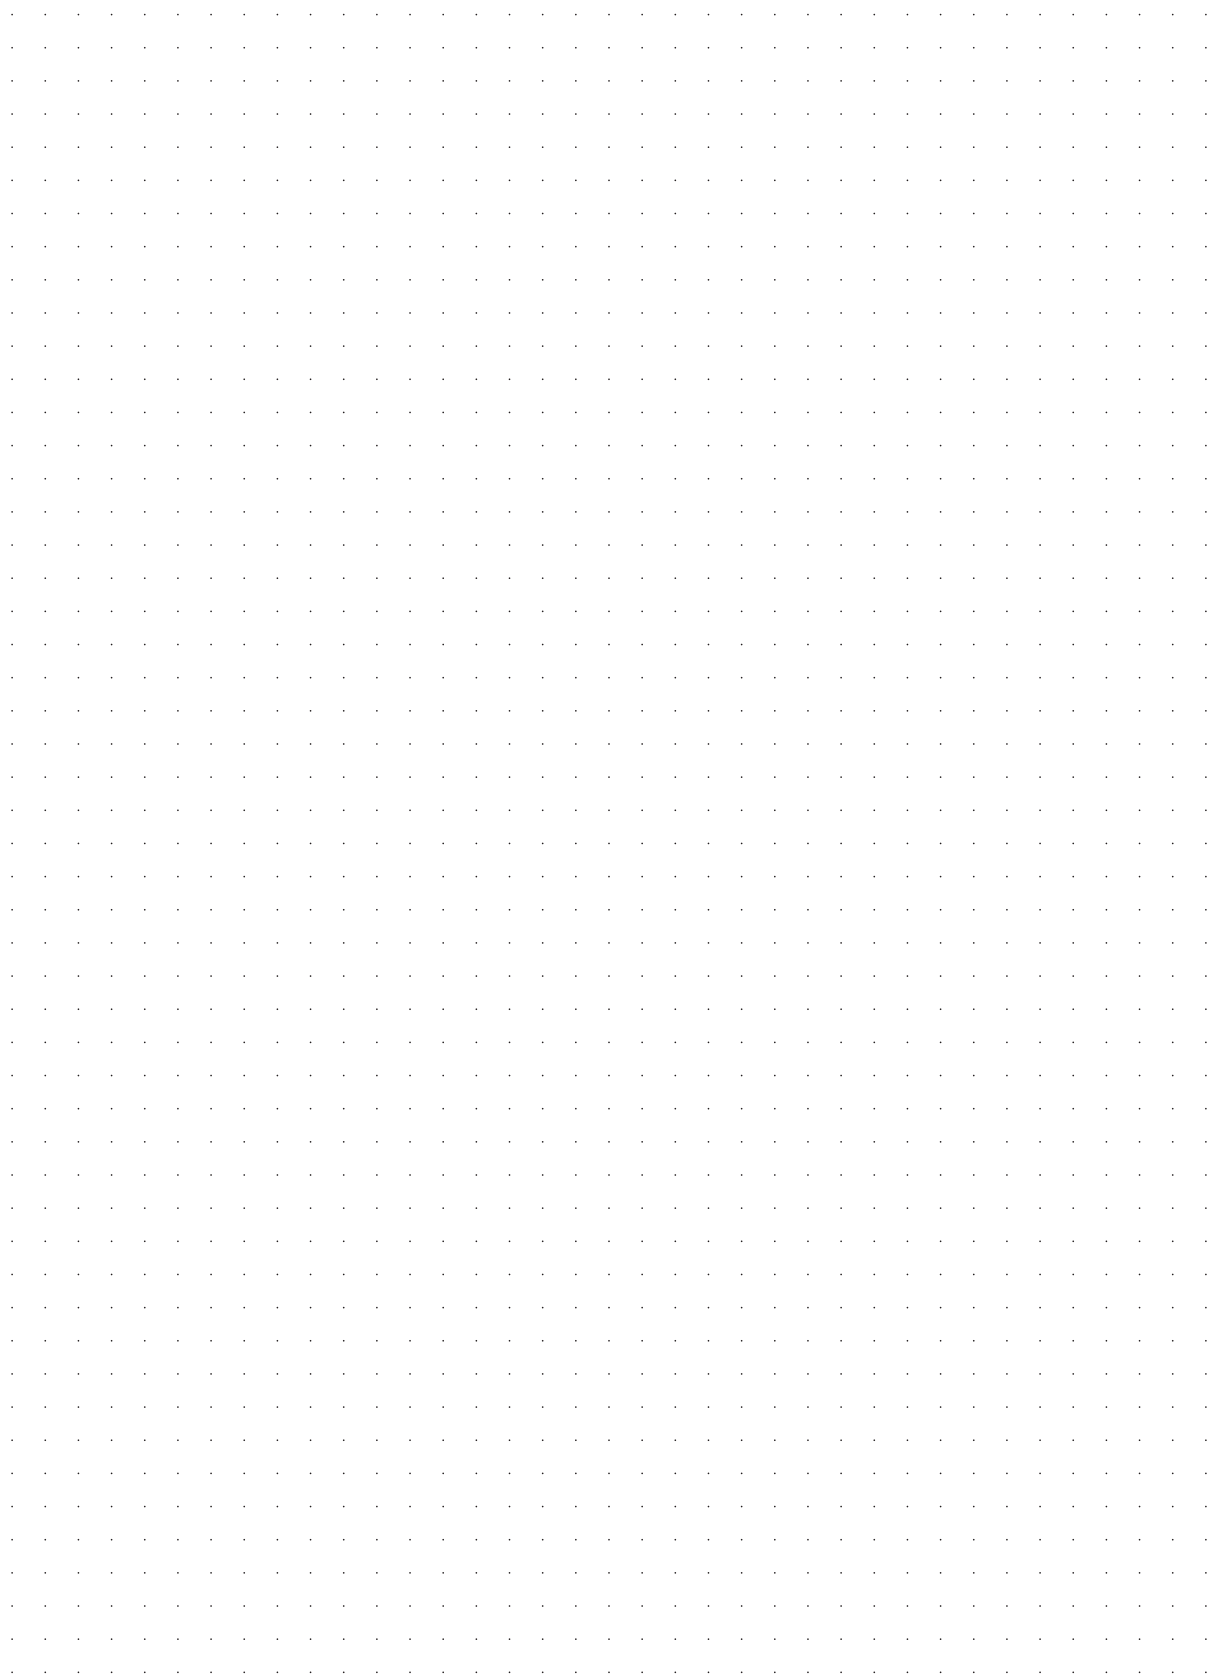

It is recommended that the tap be constantly rinsed and dried to avoid aesthetically unpleasant limescale deposits. If limescale is found on the surface of the product, it can be dissolved using diluted vinegar (maximum concentration 10% at 20°C) and then rinsed with plenty of clean water. For more information, please consult our website: nobili.it / support / care and maintenance

NOTES

A small space for great ideas, useful for taking note of business information, product features, or designing drafts directly on this volume, so you always have them at your fingertips. A universal support to be used according to the individual needs, which helps to not lose any data essential for the professional.
